PASS Program

Spring 2024

**7 Viking Drive
Wareham,
Massachusetts 02571**

Program Description and Expectations:

Pathways to Academic Student Success is a night school program of studies for students who wish to complete their high school education and receive a high school diploma from the Wareham Public Schools.

Students who choose to enroll in the PASS Program do so because they are committed to their education. Consistency is the key to commitment. The PASS Program is a work and competency-based program that operates with the same high academic expectations as Wareham High School.

Students should understand that the PASS Program is a voluntary option for students for whom regular WPS daytime classes or classes at another school have not worked. The PASS Program is a second chance to complete coursework towards graduation.

Each student will be expected to review and sign a student and family contract that outlines specific program regulations in addition to the policies outlined in the WPS Student Handbook.
